(54) Title: A WEATHER PROOF DOME TO ENVELOP OUTDOOR OBJECTS, USE OF SUCH A DOME AND A METHOD  
FOR PROTECTING OUTDOOR OBJECTS

(57) Abstract: The invention refers to  
a self-supporting weather proof dome to  
envelop outdoor objects, the dome being of  
a material and structure that maintains the  
shape of the dome and clearance between  
the dome and the objects whereby the  
dome comprises an inner structure (11) that  
withstands external pressure forces and an  
outer structure (12) that through pulling  
forces on the outer structure holds the inner  
structure together, which outer (12) and  
inner (11) structures are not bonded to  
each other and at least the outer structure  
is attachable to a base mount. With an  
embodiment of the invention, the dome  
(11-12) consists of an inner structure made  
of form rigid cellular plastic (11), with an  
enveloped outer structure (12) consisting of  
an UV-resistant, plastic fabric wind-stopper.  
The invention also refers to the use of such  
a dome and a method for protecting outdoor  
objects.
